Subject: RE: Comments on Difenconazole about Treated Seeds

They have released the ID as well which responds to the comments and changes to the mitigation. None of the changes to the mitigation were directly to the seed label language but environmental hazard statements. That is included in the attachments I sent. See page 11 in that ID.

Quinn – DO you know how these comments are being addressed? Is there anything in draft to review.

Subject: FW: Comments on Difenconazole about Treated Seeds

Hello Amber,

I am forwarding this email from Lauren regarding the comments on the difenconazole PID that related to the mitigations for seed treatment. There is not really any information pertinent to us in the center for food safety comment but in the syngenta comment they specifically mention some of the mitigation language pertaining to seed treatment.

Best,
Quinn

Hi Quinn:

Attached are two comments; one from Syngenta and one from Center for Food Safety, as well as the signed difenconazole ID.

Please let us know if there is anything else you need.

Subject: Comments on Difenoconazole about Treated Seeds

Good Afternoon,

Were there any comments regarding treated seeds following the comment period on the difenoconazole PID? We are trying to see if they had anything we should incorporate in the language for treated seeds moving forward based on any comments that may have come in. Please let me know if you have any questions or thoughts.

Thank you,
Quinn
